

***HOW A NEAR DEATH
EXPERIENCE LED ME TO
DISCOVER A SOLUTION
TO GOOD HEALTH NOT
EVEN THE DOCTORS
WANTED TO SHARE...***

By Bill Froehlich

BILL FROEHLICH

BEFORE MY DISCOVERY

I was depressed, low energy, and endured leg pain from statin drugs

AFTER MY DISCOVERY

A lot more energy, excited about the future and, my leg pain is gone!

SINCE MY DISCOVERY

- I am excited about life again and the possibilities
- Started walking again, riding my bicycle wearing clothes that have not fit in a while
- Decided that I would like to help others that may have Health Challenges
- Helped others overcome Health Challenges just like myself

THE CHALLENGE

One in Four Deaths From Coronary Heart Disease. Why?

On June 23, 2017, In Rapid City, SD. I had a near-death experience with what was supposed to be a simple Heart Catheterization, (That's What They Told Me) but it turned deadly.

Yes, an artery collapsed during my Cath Test and I had a major Heart Attack! Somehow, during all that commotion, they managed to put "7 Stents" around my Heart area.

I had no idea I had Heart Disease. I am angry because I could have most likely prevented this incident. Doctors saved my life but I should have been doing things for my own good health but I had pretty much thought in my own mind that I was 'OK.'

Heart disease kills 1 in 4 people for many reasons. There is an old saying "What doesn't kill you makes you stronger." I don't agree, I think what tries to kill you makes you angry and sad. You want answers you want to find out how to prevent this again.

What I learned (Just in Time) is, our bodies produce Nitric Oxide but as we age it decreases. It needs to be replaced.

I faced depression, severe leg pain, no energy, and the medications started to take a toll on my body. It was awful.

I tried everything to get off medications and get healthy...some things worked, most did not. It was very discouraging...

But then from my research, it led me to information about Nitric Oxide Therapy. The secret to 'No More Heart Disease'.

The Doctors Called Me The 'Miracle Man'

Soultion - 'A Miracle Molecule'

Restore Your Health Naturally With No Side Effects

My question is, why won't Doctors share a Nobel Prize Technology that can help restore your heath naturally, but will throw you on a drug quicker then you can say 'Statin'?

"Nobel Prize Winning research on 'Nitric Oxide Therapy' helps us understand how the lining of your cardiovascular system, when properly nourished, produces this molecule called nitric oxide for improved blood flow.

The whole idea of restoring my heart health naturally, without statin drugs, blood pressure medicine, and worrying about getting plugged up again... got me really excited!

The best part is that I could do it in less than 2 minutes a day.

Results

A Lot More Energy, Better Health and Off 10 Medications

Can you see yourself avoiding major health issues, like heart disease, stokes, or diabetes? Then 'Nitric Oxide Therapy' is the answer.

I am sad but at the same time I am excited. I am sad because I did not learn about this sooner but excited about how it has helped me enjoy a normal life without all the side effects of drugs.

Don't get me wrong, drugs used when needed can save lives, but what about allternative medicine that can saves lives as well? I feel a therapy that is listed in the Phisicans Desk Reference, cliinical studies to back it up, and a Nobel Prize given to three Doctors for it's discovery, should be shared!

I will probably never lose all my fear of having a Heart Attack. But with learning how to take care of myself through Nitric Oxide Therapy, I feel much more confident that it won't happen again.

N.O. More Heart Disease!
